

Core ChE Concepts: I and II

- › Two-semester online chemical engineering sequence offered in Fall/Spring
- › Courses count as two electives (6 credit hours) toward NC State's M.S. in Chemical Engineering
- › Designed to prepare students with backgrounds in chemistry, biology or other engineering degrees for graduate study in chemical engineering
- › Excellent continuing education option for engineers and scientists who want an overview of core chemical engineering concepts
- › Individual modules feature short video lectures, worked examples, conceptual quizzes and interactive features for student support.
- › Initial offering of the courses will be in Fall 2018 – Spring 2019 by award-winning instructors Drs. Lisa Bullard and Matthew Cooper
